

# AR Denials Management

A well-organized, competent and economical accounts receivables and claims denials management process determines the revenue cycle profitability for healthcare providers. Together, both these processes are critical to the successful running of a healthcare practice.

# Our Expertise

ApexonHealth, a global leader with 10+ of years of experience in providing end-to-end revenue cycle management services, empowers clients with innovative and timely solutions to increase cash reserves and manage denials. Our solution delivers measurable results, lowers the burden on your internal organizational processes and staff, and can be rapidly implemented. It consists of:

A/R Management	Denials Management	Advance Analytics
<ul style="list-style-type: none"><li>• Collections</li><li>• Old AR</li><li>• Eligibility &amp; Demo verification</li><li>• Resolution focused AR follow-up</li><li>• Patient calling and collections</li></ul>	<ul style="list-style-type: none"><li>• Credit Balance</li><li>• Appeals</li><li>• Correspondence Entry</li><li>• Root Cause Analysis A/R follow-up</li><li>• Increased accuracy of claims submission</li><li>• Lower claim collection time</li><li>• Reduce claim defaults</li><li>• Scoring of likelihood of claim approval</li><li>• Actionable Reporting</li></ul>	<ul style="list-style-type: none"><li>• Operation and Business metrics dashboards</li><li>• Identification of Anomalous Trends</li><li>• Claims denial propensity</li><li>• Denial trend and root cause analysis</li><li>• Forecasting tool</li><li>• Automated Eligibility tools</li><li>• Revenue leakage analysis - Contract, coding</li><li>• Cloud-based solution</li></ul>
